Synopsis
This unique text’s format makes it easy to diagnose and treat occupational toxicology patients, whether they know the substance of their exposure or not. Organized by occupation, industry, and environment, it covers what agents are plausible for exposure, systemic effects, and suggested treatments. Covers everything needed to understand, diagnose, treat and refer patients of toxic exposure. Provides a chemical agent cross-referencing system. Contains photographs from the Bettmann archives of historical photographs. Addition of new Associate Editor: Gayla McCluskey, CIH - President of the American Industrial Hygiene Association. Revises and updates all chapters with the latest information. Features 25 new chapters. Includes new contributors and new illustrations.

Customer Reviews
The only book of its kind that examines the toxicology of work related illness by occupation. So, a practitioner faced with a patient can look up and read about the toxic hazards that are specific to that patient’s job or occupation. This book rated as one of the best by the American Journal of Industrial Medicine
