Contemporary Issues In Animal Agriculture (3rd Edition)
Synopsis

This book, previously titled Impacts of Livestock Production, objectively deals with a number of important issues that are affecting livestock production and the public perception of animal production on a global basis. Some of these issues include consumption of animal products and human health, global warming, biotechnology and animal rights. The volume examines domestication of animals and their contributions to human welfare, animal products in the human diet, principles of animal nutrition and the scientific feeding of livestock, feed additives and growth promotants in animal production, environmental concerns involving livestock production, livestock grazing and rangelands issues, industrialization and globalization of animal agriculture, food quality and safety issues, bioethics, animal welfare, animal rights, and biotechnology issues, and livestock integration into sustainable resource utilization. For anyone involved with animal and poultry science.

Customer Reviews

Very interesting, if not more than a little one-sided. I got this for a required class and some of the things are a little outdated, but it is still a good read.

My daughter teaches AG & this filled the bill for what the needed Book was in presentable shape and usable
Interesting read, things are well explained.

I didn’t really use this book much. It was "required" for my undergrad class, but we rarely used it. It did have good information in it, but it was a little biased.
